

LANDSCAPE MAINTENANCE TESTIMONIAL

"In February 1997 the turf in the Lakepoint HOA started showing yellow streaking throughout the property. Innovative Solutions was brought in to determine the cause and to recommend the best way to restore the grass to its prior healthy green color. The problem turned out to be related to a mower that was leaking fuel. There were 2 areas left untreated as a control, the difference between the treated and controlled areas was dramatic after only 2 weeks. When the control areas were eventually treated they also responded favorably and quickly. We were very pleased with the results and more importantly so were the homeowners."
