Dear Rick:

Thanks for introducing us to your products! I was very impressed with the quick results we saw when using Humega, SW-3 and Fulvic Acid before installing new sod at our new Aurora Municipal Center site. The treated areas demonstrated substantially better root development in a matter of days. They were securely "rooted in" a full week faster than the non-treated areas. I am currently expanding the use of these products to many other areas. I look forward to getting the quality of soil and turf to improve greatly in a relatively short time. I look forward to your continued support and expertise. Thanks for everything.

Sincerely,

Jeff Prink

Maintenance Supervisor
