Applications Instructions:

For new or recently cleaned Septic Systems add 1 quart per month through any drain or toilet that is directly connected to your septic tank or pond. Flush with water after application. The application can be split between several drains or alternate drains monthly.

Do not add ProBiotic Scrubber® Septic System Solution to any drains connected to a gray water system.

For older or troublesome Septic Systems the initial application should be 4 quarts followed by adding 1 quart per month using the methods described in paragraph 1 above or limited use Septic Systems, like seasonal use properties, add 3 to 4 quarts per calendar quarter (or visit to the property) through any drain that is directly connected to your Septic Tank or Pond. Do not exceed 16 quarts per year.
