Dear Mr. Allen and Mr. Drake,

I would like to thank you and John Drake of Farm Service Center Co. for introducing me to BioScrubber. As the Del Norte Waste Water Operator I started using Bio Scrubber in our sewage treatment plant in April 2003. I have noticed several improvements since then.

The most immediate was the reduction in duckweed. I can control duckweed simply by adding Bio Scrubber. My number 3 pond will sometimes get a flush of duckweed in the summer and I just go to the inflow and add a bit more Bio Scrubber and in a few days it is gone.

Algae Blooms are nearly a thing of the past. They used to be a major problem and now they are really of no concern I just have a little algae that shows up from time to time but the large deposits are not a problem.

I am most pleased with our rate of compliance. In 2003 we were out of compliance nearly every month of the year and the town had a terrible history with the state. In 2005 we were in compliance 8 months and the other four we were very close. This is great. I believe that I know why I was out the four months. When I use BioScrubber and run the aerators at full speed I get out of compliance. I have found that by using BioScrubber and slowing the aerators to a minimum I get back into compliance right a way. This has been a good thing both from the compliance standpoint and the money standpoint. I am saving about \$800 per month in electricity bills. This savings alone more than offsets the cost of the product.

There is more. Our BODs are also lower. I am running about 20 points lower per month then records of past years indicate, for example September of 2001 we had a reading of 20 and in September of 2005 our reading was 8. My number one pond had 12.2 inches of sludge in it in April of 2003 and in August of 2004 it was tested and had 8 inches. A sludge removal company tells me that this reduction will save us over \$30,000 if and when we have to have it pumped. I am continuing to use BioScrubber and I hope that we may be able to dodge the sludge cleaning company altogether.

Rick I am very pleased with BioScrubber and I intend to keep using it in my wastewater treatment program and would recommend your system to other operators.

You may use my name and provide my contact information to anyone with questions.

Sincerely

A handwritten signature in black ink, appearing to read "Kevin Larimore". The signature is fluid and cursive, with a large loop at the end.
