plants

## BioFlora 8-8-8<sup>®</sup>

## Product Technical Data Sheet

BioFlora<sup>®</sup> 8-8-8 is a complete, organically based nutrient formulation for agricultural field and row crops, trees, and vines. It is a balanced nutrient blend complexed with humic substances.

BioFlora<sup>®</sup> 8-8-8 contains plant extracts, humic acids, and carbohydrates that, when applied as a foliar is quickly absorbed through open stomata on leaf surfaces. Foliar absorption is especially important to stressed plants that have lost their ability to produce enough photosynthates to sustain them

### Guaranteed Analysis

Total Nitrogen (N)	8.00%
8.0% Urea Nitrogen	
Soluble Potash (K <sub>2</sub> O)	8.00%
Iron (Fe)	8.00%

### Derivation

Derived from phosphoric acid, potassium hydroxide, urea and seaweed (*Ascophyllum nodosum*).

### Density

10.50 lb per gallon  
1.26 kg per liter

### Product Support

Consult your BioLynceus<sup>®</sup> Environmental Concierge<sup>™</sup> for product support, application information and current pricing.

### Application Details

For field and row crops apply 1-2 gallons of concentrate per acre biweekly. For trees and vines apply at the rate of 2.5 gallons mixed with 100 gallons of water and spray over foliage and drip zone.

### Compatibility

Use alone or with any common use fertilizers. Jar test for compatibility before mixing. **Shake or circulate before use.** Timing and frequency of application should be based on soil and tissue testing. For foliar and soil applications.

### Storage and Handling

Store in original container in a cold dry place out of direct sunlight. In case of accidental exposure, flush with water. Product is non-hazardous. May stain clothing. Wear eye protection. Protective gloves recommended.

#### Keep Away From Children - Not for Human Consumption - Do not allow product to freeze.
