

BioFlora® 8-8-8

Product Technical Data Sheet

BioFlora® 8-8-8 is a complete, organically based nutrient formulation for agricultural field and row crops, trees, and vines. It is a balanced nutrient blend complexed with humic substances. **BioFlora® 8-8-8** contains plant extracts, humic acids, and carbohydrates that, when applied as a foliar is quickly absorbed through open stomata on leaf surfaces. Foliar absorption is especially important to stressed plants that have lost their ability to produce enough photosynthates to sustain them.

Guaranteed Analysis

Total Nitrogen (N)	8.00%
8.0% Urea Nitrogen	
Soluble Potash (K ₂ O)	8.00%
Iron (Fe)	8.00%

Derivation

Derived from phosphoric acid, potassium hydroxide, urea and seaweed (*Ascophyllum nodosum*).

Density

10.50 lb per gallon
1.26 kg per liter

Application Details

For field and row crops apply 1-2 gallons of concentrate per acre biweekly. For trees and vines apply at the rate of 2.5 gallons mixed with 100 gallons of water and spray over foliage and drip zone.

Compatibility

Use alone or with any common use fertilizers. Jar test for compatibility before mixing. Shake or circulate before use. Timing and frequency of application should be based on soil and tissue testing. For foliar and soil applications.

Storage and Handling

Do not store in galvanized steel or black iron tanks for prolonged periods. Use nonmetal piping and valves. Keep out of direct sunlight. In case of accidental exposure, flush with water. Product is non-hazardous. Wear eye protection and gloves. May stain clothing.
