PRODUCT TECH SHEET
BIOLYNCEUS PROBIOTIC SCRUBBER I

Septic Systems, Ponds, and Water Features

Initial Application: Distribute two quarts (64 ounces) amongst all drains that are directly connected the septic tank (toilets, sinks, showers bathtubs, clothes washer, dishwasher, etc.), pond, or Water feature as applicable. Do not add ProBiotic Scrubber® to any drains connected to a gray water system.

For Septic Systems with existing challenges (odor, backup, etc.) the initial application should be 4 quarts distributed as directed above.

Following the initial dose, add 1 quart per month using the methods described in paragraph 1 above. For seasonal-only-use Septic Systems, following the initial dose, add 3 to 4 quarts per calendar quarter through any drain that is directly connected to your Septic Tank, water feature, or Pond as applicable.

This product is designed to improve biodegradation of solids in your system and help keep leach lines and fields open. It is not designed to repair any structural damage to your drain lines, septic tanks or leach lines. ProBiotic Scrubber® is not effective in removing tree roots from lines or tanks. It is designed to provide water clarification to water features and ponds. Do not allow product to freeze. Store at 50 degrees Fahrenheit or higher. Product Shelf Life: 24 months from date of purchase.

Note: buyer assumes all risk of use, storage and handling of this material. Neither the manufacturer, seller, nor its agents make any warranty, expressed or implied, concerning this product, except in conformity with statements on the label. Information regarding this product including product SDS can be obtained from BioLynceus. ProBiotic Scrubber® is a registered trademark of and is manufactured by BioLynceus, LLC. BioLynceus, LLC is the sole source provider of this product.
