BioLynceus Lot 125®

Product Technical Data Sheet

OMRI LISTED

Lot 125® is a biological (contains only natural ingredients) product that aids in the conversion of fertilizer to complex plant nutrients, helps buffer salts and augments micronutrient availability. It promotes soil aeration and water penetration of soil particles thereby reducing runoff. Nutrients are stabilized in the rhizosphere where they remain available over a longer period of time. **Lot 125®** contains humic substances, which greatly enhance the photosynthetic rate of the plant. **Lot 125®** when mixed with other fertilizers, enhances their absorption rate.

Derivation
Humic and Fulvic Acids are derived from leonardite.

Density
8.70 lb per gallon
1.04 kg per liter
