ProBiotic Scrubber® HCC Product Technical Data

ProBiotic Scrubber® HCC is a natural liquid bioaugmentation formulation designed to increase decomposition of organic materials. **ProBiotic Scrubber® HCC** is a scientific formulation of beneficial bacteria cultured in a controlled environment to ensure a consistency in microbial quality and quantity designed to enhance the biological degradation of petroleum hydrocarbons.

Derivation
Derived from kelp, blue-green algae, minerals, micronutrients and naturally occuring bacteria.

Density
8.30 lb per gallon
0.99 kg per liter

Storage
It is recommended that the product be used within 12 months of purchase.
Avoid excessive heat. Avoid direct sunlight. Do not allow product to freeze.

Handling
Product is non-hazardous. In case of accidental exposure, flush with water. Refer to SDS.

Application Instructions
Application rates require recommendations by a BioLynceus® representative for this product. All application details and project scope for the use of this product is only available from a BioLynceus® representative due to the complexity of different sites and the different types of facilities.

Application & Program Efficacy
This is a specialty blend that is premixed for the prescribed application. Product should be used within twelve months of date of purchase. Product contains biostimulants, nutrients and natural occurring microbiology and should be used as prescribed by your BioLynceus® representative. For any questions about the program application and site specific strategies to mitigate petroleum hydrocarbons, please consult with your BioLynceus® representative.

Beware of counterfeit products; only purchase BioLynceus BioLogical Solutions® products from authorized retailers to guarantee authenticity. All BioLynceus® products not bearing the BioLynceus® name and logo are counterfeit and should be reported to cfo-coo@biolynceus.net and Reportfraud.tc.gov.

Features and Benefits
Utilized in wastewater streams to improve the reduction of petroleum hydrocarbons, BOD and TSS

- Provides natural materials to remediate unwanted petroleum hydrocarbons in water and soils
- Can be used to remediate industrial contaminants
- Provides effective remediation of petroleum hydrocarbon product in water and wastewater streams
- Does not contain materials that are toxic or harmful to the environment

Keep Away From Children – Not for Human Consumption
Note: buyer assumes all risk of use, storage and handling of this material. Neither the manufacturer, seller, nor its agents, make any warranty, expressed or implied, concerning this product, except in conformity with statements on the label. Information regarding this product can be obtained from BioLynceus®. Do not allow product to freeze.
